10m Solar Street Light Pole: This lighting pole is usually used in parking lots, streets, and walkways. It has a solar panel, a battery, and an LED light that work together to provide illumination. The solar panel collects sunlight and stores it in the battery. The LED lights are powered by the battery and will be illuminated when it gets dark.

Generally, 3-4m light poles are suitable for walking roads, and 5-7m solar street light poles are used for dual-lane country roads. 8-10m solar street light poles are used for three-lane or bidirectional four-lane main roads. 3)Height of other objects in the vicinity:
