How much power does a Growatt inverter produce?

Growatt's solar grid-connected inverters boast an expansive power range from 750W to 253kW, while their off-grid and storage inverters cater to a power spectrum spanning 2.30kW.

Can a solar inverter charge a battery?

B. When the battery is low voltage (i.e. the voltage of a conventional single battery is 11Vdc) and the mains power input is normal, the inverter will switch to the AC mode and the mains power will supply power to the load completely, while the solar energy will charge the battery but the mains power does not charge the battery.
