Method 1 - Series Wiring. For us, the simplest, most common way to build a 24V system is to run two (2) 12V batteries in series. We mentioned in a previous article that there are two (2) ways to wire solar panels: parallel and series. We also geeked out on how parallel and series configurations affect current, voltage, and power, so do check that one out if you're ...

Option 1: keep the 24v, sell the inverter and buy a 24v one. Option 2: make the entire system 12V. If you don't have more parts connected, it's as simple as connect the battery in parallel and connect everything. (Make sure to use thick enough cables). The mppt is also 12v capable.
