SolarEdge split 2 core functions of a typical solar inverter into 2 devices. MPPT (maximum power point tracking) and voltage management happen at the individual panel level with SolarEdge's DC optimizer (sold separately--see the listing on our SolarEdge page). But the inversion of DC to AC happens centrally at the inverter itself (in this case ...

Sunny Highpower PEAK3 stands for pure power. With its compact design, the inverter offers the highest power density per device. The advantages: optimal performance at a light weight. The result is cheaper transportation and easier installation.

Low-power inverters typically have a single AC (household) socket and one or two USB ports. High-power inverters might have four AC sockets and four USB ports. But not all USB ports are the same. On cheaper power inverters, the supply to USB ports can be as low as one amp. On more powerful models, it can be greater than two amps.
