Fashion one by bending a paper clip into an S shape. Use it to hang your clothes, scarves, belts, keys, or whatever else needs a hook. Just make sure that your paper clip-turned-hook is strong enough to hold the weight of your item. 4. Key ring/chain. If you are without a key chain or key ring, you can use a paper clip to make a temporary one.

In paper chromatography, you can see the components separate out on the filter paper and identify the components based on how far they travel. To do this, we calculate the retention factor (R_f value) of each component. The R_f value is the ratio between how far a component travels and the distance the solvent travels from a common starting ...

A homemade paper chromatography testing box is made from a tall box with a lid. A dowel spanning the width of the box is placed near the top with a binder clip to hold a paper strip that has been marked by colored pigments. The paper strip is long enough to reach the bottom of the box where there is a small pool of solvent.

Paper clips are cheap. Just a quick search online shows that you can buy a box of 1000 #1 size paper clips at Staples for \$2.99, which amounts to 3/10 of 1 penny per paper clip. So given how cheap they are, I thought a good money saving tip is to use paper clips instead of more expensive alternatives for a wide-variety of things.

How to Jump Start your power supply (Paper clip test) 1.For your safety, please turn off the power supply first, then set the I/O switch on the back of power supply (if available) to "O" position. (as show below) 2.Unplug the AC power cord from the power supply. 3.Unplug all hardware devices cable from the power supply.
