

# Battery pack delivery

What types of batteries should I pack and ship?

A UPS guide to help you safely pack and ship many kinds of batteries including lithium metal, damaged or defective batteries and alkaline or certain nonspillable lead-acid batteries.

Which shipping companies ship lithium batteries?

Well-known UPS and DHL offer lithium battery shipping services. Shipping companies use specific means of transport, and professional staff deal with lithium batteries. This professional dangerous goods transport can deliver your battery cargo faster, and they offer faster global reach and are your choice.

How do I ship lithium batteries by air?

For shipping lithium batteries by air, pilots must receive written information on the presence and location of lithium batteries. Additionally, documentation verifying that packaging meets regulatory performance standards is required.

Can you ship a battery within a country?

While there are regulations for cross-border shipping of batteries, you can generally ship batteries within a country. Many electronic products and devices contain batteries, especially lithium batteries found in laptops, smartphones, tablets, medical devices, and power tools.

Can I ship a lithium battery internationally?

Lithium batteries are classified as Dangerous Goods and not all types are accepted by DHL Express. There are regulations attached to the cross-border shipping of batteries, including lithium batteries, to ensure they travel safely. These regulations vary depending on the type of batteries.

How should you pack a battery for shipping?

To pack a battery for shipping, use plenty of filler packaging to prevent it from moving around. Then, place it in a sturdy outer box or container, secure it with tape, and attach the correct shipping label.

The battery pack SOC is defined as the average SOC value across all cells in the pack. [104] The battery pack SOC is determined by the SOC of cells at boundary voltages:  $V_{max}$  during charging and  $V_{min}$  during discharging. [105] The battery pack SOC is the ratio of the pack's remaining available capacity to its total capacity. [106]
