

# Berne box-type UPS uninterruptible power supply company

How many software products are available under uninterruptible power systems (UPS) segment?

Under Uninterruptible Power Systems (UPS) segment the company has 8 products and 4 software offerings like SolaHD(TM) UPSMON-PRO Monitoring Software, SolaHD(TM) MultiLINK Configurator Software for UPS Units: 4.2 SolaHD(TM) UPSMON-PLUS Monitoring Software, and SolaHD(TM) MultiLINK Configurator Software for S4KC UPS Units: Version 180.

What is uninterruptible power supply (UPS)?

The company's products, mainly Uninterruptible Power Supply (UPS) and related communications software provide power protection for a wide range of requirements from large mainframes to midrange systems, PC networks and standalone PCs serving major corporations, small businesses and individual users.

What is a ups & how does it work?

A UPS is a device that supplies power to load equipment for a certain period of time in the event of a power failure due to a power outage. UPS stands for Uninterruptible Power Supply. Since power grid outages generally last from a few seconds to a few minutes, the use of a UPS can often avoid equipment shutdowns.

What are the different types of ups?

The three most common types of UPS systems are standby (offline), line-interactive, and online double conversion. A Standby UPS, also known as an offline UPS, is the simplest type of uninterruptible power supply. But with that simplicity also comes a lack of power conditioning.
