Types of Uninterruptible Power Supplies. The types of UPS include: Single Conversion UPS System. These feed incoming utility AC power to IT devices in regular operation. If the AC input supply goes outside of established limitations, the UPS draws current from the battery and disconnects the AC input supply to prevent backfeed from the inverter to the utility.

Uninterruptible Power Supply Systems (UPS) are redundant power supply devices that store power in a battery to which electronic equipment can be connected. They act as a firewall between the mains supply and the equipment. During an outage, overvoltage, voltage dip, etc., they provide continuity in the alternating current supply by transforming the direct current from ...

Uninterruptible power supply system generates input and output three-phase line voltages 220, 380 V AC to power range from 15 up to 60 kVA according to Customer's request. Accumulator battery voltage is also selected according to Customer's request and DC consumers availability.
