

# Caracas Generator Container Company

What is a containerized generator enclosure?

They are designed to be easily transported using standard transportation methods, such as trucks or shipping containers. The modular design allows for quick assembly and disassembly, enabling hassle-free relocation whenever needed. What additional features can be incorporated into the containerized generator enclosures?

What is a Tier 4 containerized generator?

Our Tier 4 containerized generators are high-powered --500 kW to 1250 kW-- units packaged in 30-foot or 48-foot ISO containers.

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.

What is a self-contained generator enclosure?

It utilizes shipping containers or modular structures to create a self-contained environment for generators of various sizes. These enclosures are specifically engineered to provide flexibility, mobility, and durability while ensuring the safe and efficient operation of generator systems.

What is a dual pack generator?

Simply put, dual packs are two parallel generators in one ISO container: Two 500 kW generators could be paralleled to achieve a 1000 kW output, or two 625 kW generators to achieve 1250 kW. This dual configuration increases the longevity of the overall unit by preventing the effects of light loading.

What makes a good generator enclosure?

Our enclosures are thoughtfully designed to maximize efficiency and functionality. We incorporate features such as access doors, ventilation systems, soundproofing materials, and fire suppression systems to optimize performance and ensure the smooth operation of your generator.

Jet power container type generator set can divide into 20' container type and 40' container type. The container type genset can be directly shipping as a standard container, greatly save transportation costs. The power below 1250kva, it use the 20 container type, and it'll use 40' container type if the genset power above 1250kva.

Breakdown of the Project. 10ft x 8ft x 8ft 6" new build shipping container converted to a bespoke generator store to customer specification. We were approached by a leading construction company based in the South East of England who had a requirement for a secure mobile generator store for use during construction projects.
