The challenge of the market - lithium batteries for power tools. Suitable batteries are essential for the performance and efficiency of power tools, such as drills, saws, and sanders.. One challenge faced by power tool manufacturers is finding high-quality cells, which help determine the capacity, maximum power, and lifespan of batteries.

When a lithium-ion battery is over-drained, its protection circuit turns it off, making it dysfunctional to be used, or recharged by the charger. This may happen due to overuse or leaving the battery for too long on the charger. For example, using an impact wrench for too long can drain the battery voltage so low that the charger would fail to recognize the battery for charging. Here ...
