

# Container energy storage in Auckland New Zealand

Which energy company is building New Zealand's first grid-connected battery energy storage system?

Meridian Energy is building New Zealand's first large-scale grid-connected battery energy storage system (BESS) at Ruakaka on North Island. Paris, January 10, 2023 - Saft, a subsidiary of TotalEnergies, has been awarded a major contract by Meridian Energy to construct New Zealand's first large-scale grid-connected BESS.

Why are battery energy storage systems important in New Zealand?

There is growth in renewable energy generation as New Zealand moves to a low carbon economy. But renewable energy like solar and wind are intermittent which means Battery Energy Storage Systems, which can be flicked on to supply power quickly, are important to manage winter peaks, and to make the national power grid resilient.

What is a battery storage container?

Suitable for tech and retail clients across New Zealand, our battery storage containers help secure lithium and other types of batteries--and can reduce the risk of fire in the event of an emergency. We recently delivered 50 battery storage containers to a client in the automotive sector.

Who can use our rentable battery storage containers?

Private individuals and businesses can use our rentable battery storage containers in any setting where they can physically be installed. Benefits include: Energy independence: break free from the grid and power your home or workplace with clean, reliable energy that you control.

Why should you hire a battery storage container?

Further evidence of our commitment to battery safety can be seen in our shipping containers for hire as battery storage centres. Suitable for tech and retail clients across New Zealand, our battery storage containers help secure lithium and other types of batteries--and can reduce the risk of fire in the event of an emergency.

Is New Zealand a key market for storage solutions?

Power Electronics NZ Ltd Operations Director Brent Sheridan sees New Zealand as a key market for storage solutions with future generation growth primarily being led by solar and wind technology. "Both these forms of generation work perfectly in combination with batteries to provide a continuous and stable energy supply.

# Container energy storage in Auckland New Zealand

A battery energy storage system (BESS) is a technology that allows for the storage of electrical energy in batteries, which can then be used to power electrical loads. BESS can be used for a variety of applications, including grid stabilisation, load shifting, backup power, and integration with renewable energy sources such as solar and wind power.

Battery energy storage systems are set to play an increasingly important role in New Zealand's electricity supply. As companies like Meridian grow the amount of renewable energy from sources such as wind and sun - where the timing of generation can't be guaranteed - battery energy storage systems provide somewhere to store energy for use when demand is high.
