

# Container generator set quotation

What is a containerized diesel generator set?

This containerized diesel generator set is developed by Ausonia S.r.l.. This generator set is custom made specifically for power plants in LV and mV ... DIESEL GENERATORS T2 T2 series diesel generators adopt PowerLink engine to meet the needs of energy service production. Their power ranges from 8KW to 3500KW.

Why is a genset necessary for a reefer container?

A reefer container does not cool itself and therefore a generator set is necessary, to provide it with electricity all over the world. A genset, short for generator set, is a power unit that can be attached to a reefer container and provides the container with electricity.

What is a genset and how does it work?

A genset, or generator set, is a unit that provides cooling to a reefer or refrigerated container by being attached to it.

Can a genset be used on a ship?

When it comes to using a genset on a ship, it is usually powered by the ship's electrical power during transport overseas on container vessels. However, when used on a cargo truck, it is typically powered by diesel as there is no electrical power supply available.

How to choose a generator set?

max. Other features can help you select your generator set: Voltage regulation: the cheapest generator sets are not equipped with an output voltage regulation system. Without this regulation system, equipment connected to the generator set can be damaged, especially if its electronic components are sensitive to overvoltages.

How is a clip-on genset linked to a reefer container?

A new clip-on genset is a generator that is linked to a reefer container to provide it with power. An 'underslung' can be attached to the frame of the truck, so it doesn't have to be demounted when another container is loaded onto the truck.
