

Do I need to prepare outdoor power supply during typhoons

How to prepare for a typhoon?

Prepare a flood kit of essential items before a typhoon. This kit should include items like food, water, first aid supplies, important documents, and other essentials. Additionally, have a knowledgeable person inspect electrical wiring before using electrical appliances after the typhoon.

Can you use electrical appliances after a typhoon?

After a typhoon, it is usually advisable not to use electrical appliances immediately, especially if your house got flooded. Have a knowledgeable person inspect electrical wiring before using any appliances. Check for any damage, including water pipes, and make necessary repairs as soon as possible.

What should you avoid during a typhoon?

During typhoons, avoid going outdoors: if there is a need to, be careful of falling advertisement signboards and large scaffolding, as well as toppling street trees or utility poles. When driving through a tunnel, pay special attention to the water level; do not forcefully pass through to prevent the car from stalling.

What should you do before a typhoon strikes?

Before a typhoon strikes, assembling an emergency kit is vital. Here's a list of essentials you should include: Preparing your home is essential to minimize damage. Here are practical steps to take: Inspect for loose tiles or shingles. Clear your gutters to prevent water damage. Board up windows or use storm shutters.

What should you store for food before a typhoon?

Before a Typhoon: Help your family check and fix your house for any damage (especially the roofs and windows), so it can withstand the strong winds. Remind your family members to stock up an adequate food supply such as rice, canned goods, and foods that would last even without refrigeration.

Should you unplug your home during a typhoon?

The rule of thumb is that if you can move it around, no matter how large, you'll need to secure it. If the typhoon becomes stronger than expected, you'll also have to unplug all your appliances to prevent fire. This should go without saying, but apparently it needs to be said.

1. The document provides guidelines for safety precautions during typhoons, including preparing an emergency kit before the typhoon arrives and staying indoors during high winds and flooding. 2.
