What is a Portable Generator. A portable generator is a device that generates electricity by burning fuel, usually gasoline or propane. It runs as long as it has enough fuel and oil and requires periodic maintenance for it to continue running.. Portable generators have a control panel, which can feature multiple power outlets, including 15, 20, 30, or 50 amp sockets.

Kidatu power plant was built in two phases under the name of Great Ruaha Power Project that was carried out in 1970's for phase one and 1980's for phase two. Phase I was completed in 1975 that comprised of construction of an earth-rock fill dam, an initial capacity of 2 x 50MW, and 220kv transmission line to Dar es Salaam via Morogoro.
