In Ireland, the power adapter you'll require is designed for the country's 230V and 50Hz electrical infrastructure. So, for a worry-free visit to the Emerald Isle, don't overlook the seemingly small yet significant details of securing the ...

There are approximately 40 countries that use 60 Hz while the rest typically run on 50 Hz current. Single-phase power is primarily for residential use (such as homeowners and what you would find in a hotel) while 3-phase electric power provides more stable, heavy-duty power for most industrial applications like manufacturing plants, commercial facilities, data centers, telecom ...

Dublin's electricity infrastructure is ageing and reaching its end of life. Work must be done now to transform and modernise the city's infrastructure so Dublin can continue to develop and thrive, while increasing the power from renewable sources. In this first phase, with our project partners, we are installing over 50km of cables across Dublin.
