

Freetown 6m Solar Street Light

What is a LED based solar street lighting system?

A LED based solar street lighting system consists of a Solar PV Module, Solar charge controller, battery, and LED based luminaires, all suitably mounted on a pole. The battery is charged by electricity generated through the PV module during day time and the luminaires provide light from dusk to dawn.

When should I use a solar street light?

MLA / M.P LAD Projects This device is recommended for areas where 365 days of lighting is required and grid supply is available. The device smartly senses solar street light parameters and automatically switches to grid supply when battery is unable to provide backup.

What are LED street lights / LED flood lights?

LED street lights/LED flood lights are used to minimize the power /grid consumption and charging by solar PV modules. Havells Enviro LED Luminaires deliver lumen efficacy of more than 105 lumen per watt. The luminaires have a life of greater than 50,000 hours and have IP 66 rating which gives protection even in harsh outdoor environment.
