What Is an Uninterruptible Power Supply (UPS) An UPS is a device that supplies power to connected devices for a certain period of time in the event of a power failure due to a power failure.. It has a built-in battery and supplies power to servers, PC electronic equipment, network equipment, etc. in the event of power failure or power supply trouble, for example.

An Uninterruptible Power Supply (UPS) is a critical device that safeguards your electronic equipment from power interruptions, surges, and outages by providing backup power during such instances. Choosing the right UPS requires careful consideration of several factors to ensure reliable protection for your valuable devices.
