What does an uninterruptible power supply do? UPS systems supply practically instantaneous backup power to electrical devices: communication systems, computers, consumer electronics, network equipment, and servers, among other key equipment. A UPS won't die when there's a grid failure or power surge.

Power supplies on Jiji are usually sold as generator sets, inverters and UPS (uninterrupted power supply). Among those three types; the inverter and UPS can be bought online while you cannot buy a generator set online - they have to be bought offline from one of many second-hand equipment shops found in different parts of Nigeria.

Many models of uninterruptible power supply USP also provide surge protection. A surge protector blocks spikes in voltage so that they do not harm your electronics. So, your battery backup is always at work, protecting your desktop computer, network equipment, or other electronic equipment and charging its battery when not in use.
