North Americans will need an adapter for the outlets and a transformer for the voltage when traveling to Croatia.

What power outlets does Croatia use?

If you're coming from an extended European sojourn then you needn't stress because the country uses the same power outlets as (almost) the rest of the Eurozone. Specifically, Croatia runs on type C and F plugs, although the outlets work with type E as well. You can see we have a picture here to help you visualize it.

Why is Croatia a good country for electricity?

The country's electricity infrastructure is well-connected with its neighbors. These interconnections are not only physical but also regulatory and market-based, facilitating cross-border electricity flow. This connectivity enables Croatia to import and export electricity, balancing its supply and demand dynamics.

What makes Croatia's electricity market unique?

In conclusion, Croatia's electricity market is characterized by a balanced mix of hydroelectric power, fossil fuels, and growing renewable sources. Being part of the EU electricity market and its connections with neighboring countries are vital for its energy strategy.

number of innovative start-ups working on technology or smart grids. There are only a few producers of advanced solar energy and one producer of solar panels in Croatia. Likewise, there are no producers of bio-based energy technologies. Overall, Croatia has a need for technology and solutions for power plants, the production and use

# How much is the outdoor power supply in Croatia

As Poslovni Dnevnik writes, with just how much sun Croatia receives on an annual basis, residents deciding to go for Croatian solar power installation could save thousands and thousands of kuna a year if they decided to take the leap and get their power directly from the sun. Since the government removed VAT on it, everyone appears to be going a little crazy ...

Most Croatian hotels and private accommodation can supply you with an adaptor, but not a transformer. Otherwise you'll need to head to an electrical shop or buy one in the airport (a more expensive option). If you only need a transformer for your hairdryer, it may be cheaper to simply buy a hairdryer in Croatia (or ask your hotel or proprietor for a loan).

A dual voltage rated appliance will display for example "INPUT: 110-240V" on the body of the appliance or its power supply. This means that you will not need a converter or transformer but just a travel adaptor, because Croatia operates on a 230V supply voltage, which is within the 110-240V range that the dual voltage appliance operates on.
