These free electrons from N-type silicon, under the influence of the electric field, power through to the P-type silicon giving rise to electric current. How Do Solar Panels Work? How a solar panel works? A PV solar panel is a collection of solar cells electrically connected together and mounted in a frame -- a solar array.

In our PV store you will find a large number of solar modules from different manufacturers. You can buy solar modules from manufacturers like Canadian Solar, First Solar, JA Solar, Jinko Solar or Trina Solar.. In our solar wholesale you can find monocrystalline solar modules as well as polycrystalline modules. But we also have thin-film solar modules in stock in large numbers.
