

Indonesia backup ups uninterruptible power supply

What is ups & how does it work in Indonesia?

Another important function of the UPS system is surge protection. In Indonesia, power is supplied at 400/230 volts AC, oscillates at 50 Hz. While most electrical devices can only handle this very small variation, anything larger can cause serious long-term damage.

What is an uninterrupted power supply (UPS)?

Uninterruptible power supply (UPS) is a device that usually uses a backup battery as an alternative power supply system or an electrical backup device that serves to provide uninterrupted power supply for electronic devices.

What is an UPS system?

UPS system is a power supply system that is very important as well as being used as protection from power failures and damage to the system and hardware. Omazaki Design & Build is a contractor for the installation of electric backup equipment or uninterruptible power supply (UPS) systems located in Banten Indonesia.

What is the power supply voltage in Indonesia?

In Indonesia, power is supplied at 400/230 volts AC, oscillates at 50 Hz. While most electrical devices can only handle this very small variation, anything larger can cause serious long-term damage. The UPS system will detect fluctuations or surges and replace the mains supply as the power source for a certain period of time.

What is an uninterruptible power supply?

An uninterruptible power supply, commonly known as UPS Power Supply is easy to install a device that is designed to provide power to your computers, servers, server rooms and data centres in case of main energy failure, electrical surge or unexpected energy cut off.
