What is ABB acs580 series AC inverter?

ABB ACS580 series AC Inverter for 160kW(215HP) 400V 3 Ph motor to 293A at high overload or 200kW (270HP) to 345A when Fan/Pump rated. Operates in VxV or Sensorless Vector control and converts fixed frequency Three Phase 400V input to variable frequency 400V to control the speed of a standard AC induction motor.

So as far as I understand the 160kw inverter isn't as well supported at present with the zombieverter or OI, I'm looking for an easy conversion path but I've also found a 2019 leaf being broken and agreed a good price for the motor stack but it's the 2019 e+ so I'm slightly reluctant to get it only to have a headache having to get it running.
