

Array Junction Boxes / DC Distribution Boxes / String Combiner Boxes. These boxes provide interconnection between input leads from the solar module arrays and the output leads to the inverter. These boxes are customized for different configurations based on the series-parallel configuration layout of the solar array.

GEESYS Technologies, founded on 11 September 2011 in Chennai (Tamil Nadu, India), is a pioneer in power solutions provider engaged in the business of Electrical products and Power Electronics manufacturing and services.

The new PV AC Combiner boxes have been designed for PV systems with string inverters in trackers or fix tilt systems. The product portfolio is suitable for inverters from 60 kW up to 200 kW and support voltages of 400 V, 690 V or 800 V AC. The combiner boxes allow to collect from 2 up to 6 string inverters in one single cabinet.

The wire/distribution box is integrated into the inverters so all the wires come into the inverter and connect in a single box. It is simple to install as a result. Darfon supports all the major ESS functions with simple
