What is a solar PV inverter?

Solar PV inverters are essential for any photovoltaic (PV) system that needs to utilise AC power. Their primary function is to convert the DC power generated by solar panels into usable AC power, which can then supply the electrical loads in a property. There are many different types of solar inverters available in the market today.

What types of inverters are available?

Whether you're looking for hybrid inverters, string inverters, or solutions for three-phase and single-phase systems, we have you covered. Our selection includes high-performance inverters ideal for residential, commercial, and industrial applications, ensuring efficient and reliable power conversion.

What is a string inverter?

As string inverters are an affordable and reliable inverter, they're widely used in the market. The name 'string' comes from their ability to connect to a group of solar panels to the unit. The panels are connected in a DC circuit and the string is then linked to convert the inverters DC input.
