How does a UPS work?

A UPS (Uninterruptible Power Supply) operates by using a standalone battery as a power source, which is rechargeable, and provides electricity when the power outage occurs. Most UPS batteries, like those from Ocean, immediately kick in as soon as the home's power goes out and are able to make fans and lights work for a good length of time.

What is a UPS battery and how does it work?

A UPS battery consists of a stabilizer and a powerful battery that provides backup power during outages. Some brands have incorporated features such as strong copper wiring to ensure an uninterruptible power source from the battery. UPS batteries help make power outages less disruptive.
