Unlike a backup generator, it does not need to power up in order to start generating power. In other words, if you experience a power outage in your area, your machinery should not shut down if it is plugged into a UPS battery backup. Many models of uninterruptible power supply USP also provide surge protection.

Kitga portable ups uninterruptible power supply

The APC BR100MS2 is a powerful, pure sinewave UPS system that delivers cleaner, more stable power for protecting high-end electronics. It combines 10 power outlets with surge protection (six with battery backup) and 900 watts of power to keep power-hungry devices like desktop PCs and monitors running for quite some time.

Simply put, UPS are backup power sources but a portable power station can function either as a backup or the primary power source. Portability. UPS is a better choice for home or office operations. This is due to their bulky nature which can hinder mobility from one place to another. Unlike UPS, power stations are a great alternative to this ...
