Is 20 years a long timeframe for the energy industry?

Powell admits 20 years is a short timeframe, and the industry needs to move faster. "About 20% of the energy that customers use is electricity. By the time you get to 2045, I would expect 50 to 60% of it to be electricity based. So, customers are going to be two to three times more dependent on electricity than they are today.

How many companies are pursuing fusion energy?

"What we have today that we didn't have five, 10 or 20 years ago is we have a private sector, more than 50 companies, that are pursuing fusion energy and we have attracted more than \$6 billion dollars in investments," said Akli. Kramer Akli has been with the Department of Energy since 2016.

Why is DOE spending \$500 million a year on fusion?

This comes after researchers achieved a significant milestone in 2022 called "scientific breakeven." "For the first time in history we have achieved ignition and that you can get more energy out of the target," he said. Overall, DOE is spending \$500 million dollars a year on fusion.

Is Southern California Edison preparing for an 80% increase in electricity demand?

One of the largest investor-owned utilities in the country is preparing for an 80% increase in electricity demand by 2045. In this episode of Grid Talk, host Marty Rosenberg interviews Steve Powell who is the president and CEO of Southern California Edison.
