

# Large containerized generator

What is a containerized generator?

**Less Maintenance** The Containerized Series generator sets are designed for harsh weather and strict acoustical standards,utilizing a standard 40' high cube container equipped with an array of innovative features,allowing the system to operate reliably even in the hottest environments - validated at ambient temperatures of up to 55 degrees Celsius.

Can a containerised generator power a construction site?

At Dale,we have a wide range of containerised generator units that can power everything from a construction siteto a hospital and even large scale events. Dale's containerised generator units are able to offer bespoke designed solutions to meet your specific site requirements.

What is a 40 ft containerized generator set?

Originally launched for limited markets in 2021, the 40-ft containerized generator sets were engineered for easy transportation, simple installation and are stackable, offering up to 34% space utilization savings over traditional build designs.

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.

What size generator container do I Need?

Our generator containers for Type 2, 3, and 4 gas engines have a standard 40-foot length. Width and height depend on engine type, the application (power generation only or CHP) and ambient conditions. Customized sizes to accommodate special project requirements are available on request.

Why should you buy a Cummins containerized generator set?

**More Robust. More Control. More Reliability.** Factory pre-integrated and customizable per site requirements,the new Cummins Containerized Series generator sets can provide significantly shortened lead time for installation,and a lower cost of ownership via a flexible design.

The containerized generators come fully loaded as standard, with all the sophisticated options you could ever need. We coupled 1MVA of predictable power, in standard 20-foot container; with ultra-low noise levels and ultra-high efficiency levels.
