

London Assembled Outdoor Power Plant

When was the Lots Road Power Station built?

The Lots Road Power Station, completed in 1904, was situated on the banks of the Thames in Chelsea. It provided power to the London Underground for almost a century before it closed.

Will Battersea Power Station become a mixed-use development?

One such model conversion is taking root in the newly unveiled plan for Battersea Power Station in London. Once a coal-fired electric plant (and defunct for near 25 years), this industrial icon is getting a 21st century makeover to become a mixed use development that produces renewable energy.

What did Londoners expect from a new power station?

Londoners hoped for a new tube station and affordable housing units. They got a new tube station that makes getting to Battersea a breeze and 386 affordable housing units. Best of all, they can now experience their beloved power station as more than just a backdrop.

How much does Battersea Power Station redevelopment cost?

Situated on a 42 acres piece of land located opposite Chelsea, approximately one mile from the Houses of Parliament with about 400m stretch of the site directly oriented towards River Thames, the Battersea Power Station Redevelopment Project is being implemented in seven phases at a cost of \$13.36bn.

Who designed Battersea Power Station?

The team behind the transformation of Battersea Power Station in London, UK. Carillon completed Phase I construction under a US\$668M contract, while Ian Simpson Architects and de Ryke Marsh Morgan designed the facilities under Phase I. (dRMM). Linley created the interior design for the penthouses.

Who created the master plan for Battersea Power Station redevelopment project?

Rafael Violy created the master plan for the mixed-use development while Battersea Power Station Development Company is in charge of the project that is estimated to create around 15,000 job opportunities. The first stage of the Battersea Power Station Redevelopment Project, known as Circus West, began construction in July 2013.
