What are monocrystalline and polycrystalline solar panels?

In India, is a prominent manufacturer of solar panels, solar pumps, and solar street lights in Ahmedabad. Monocrystalline and polycrystalline solar panels serve the same function in the overall solar PV system: they capture energy from the sun and turn it into electricity.

What is a mono crystalline PV panel?

Mono-crystalline, as the name suggests, are PV panels with cells made up of a single (mono) crystal of Silicon. On the other hand, if we use multiple crystals in a single cell, then it is called a multi-crystalline or polycrystalline panel. Silicon wafers are used in the process of manufacturing mono-crystalline cells.
