

# New outdoor power supply in Pristina

How does Notus energy work in Kosovo?

Kosovo has relied almost exclusively on coal-fired power generation and electricity imports. Together with local partners, NOTUS energy carried out the permit planning, supported the financing and implemented the project as general contractor. This includes cooperation with the authorities and the transmission system operator.

Where did Notus energy build a 120 MW substation?

At the site near the village of Bajgora, NOTUS energy built a 120 MW substation to transform the wind farm's electricity to the 110 kV level. The substation is located at an altitude of 1,500 meters. From there, NOTUS energy built a 20-kilometer 110 kV overhead line to the feed-in point in the town of Vushtrria.

Where is Notus Energy substation located?

The substation is located at an altitude of 1,500 meters. From there, NOTUS energy built a 20-kilometer 110 kV overhead line to the feed-in point in the town of Vushtrria. NOTUS energy also renovated the substation in Vushtrria in the process.
