What is a portable solar generator?

Amid the range of power stations, portable "solar generators" give you a way to draw in clean electric power from our most abundant resource, sunlight. Though using one effectively is a little more complicated than many people realize.

Which battery is best for a portable power station?

These days most portable power stations, including all those we recommend here, use LiFePO4 batteries, which are capable of holding far more cycles, which is the number of times a battery goes through a complete discharge and recharge, than older lithium-ion batteries while also being less likely to combust.

What is a watt-hour generator?

Watt-hours are a measure of a unit of energy (watts) that can flow over time (hours). Consider the electronics you plan to pack or will need to keep charged, and how much juice you'll need for each one. This can also pertain to estimating generator size for potential home back-up.
