What is the best portable power station for backup?

Anker Solix F1200 (1,229Wh): This unit was previously known as the PowerHouse 757 from Anker, and was also CNET's previous pick for "best portable power station for backup." Its UPS mode was one of the earlier units to boast "less than 20ms" switchover time in the event of a power outage. It's also currently \$500 off on Anker's site.

Are solar power stations rechargeable?

Many times, solar portable power stations are also rechargeable via AC power, serving as a rechargeable generator of sorts. Electric power stations, also known as portable electric generators, operate like a large battery. Simply plug the portable power station into a wall outlet and it charges quickly.

How much power can a portable power station hold?

While a particular power station might claim to hold 1,000 watt hours, the actual amount of usable power you can get out of it is a different story. The best portable power stations also have an onboard computer that shows you how much energy is left in your unit, as well as how much power it's currently using.
