A solar power inverter converts or inverts the direct current (DC) energy produced by a solar panel into Alternate Current (AC.) Most homes use AC rather than DC energy. DC energy is not safe to use in homes. If you run Direct Current (DC) directly to the house, most gadgets plugged in would smoke and potentially catch fire.

The solar panel provides a special inverter that directly converts the DC voltage of the solar panel into an AC power source matching the power grid. Extra power can sale to ...
