

# Pretoria 24 hours ups uninterruptible power supply

What is a ups power supply?

A uninterruptible power supply or uninterruptible power source (UPS) is an electrical apparatus that provides you with emergency power to a load when the input power source or mains power fails in cases of power outages or load shedding.

What is an uninterruptible power supply (UPS) system?

An Uninterruptible Power Supply (UPS) system protects electronics and other vital equipment, infrastructure and machinery from unexpected power issues as well as provides short-term emergency backup power during disruptions to the mains electricity supply. HOW DOES A UPS WORK?

What is a ups & how does it work?

WHAT IS A UPS? An Uninterruptible Power Supply(UPS) system protects electronics and other vital equipment, infrastructure and machinery from unexpected power issues as well as provides short-term emergency backup power during disruptions to the mains electricity supply.

What happens if a ups fails?

A UPS can supply power in the event of a complete power failure or supply protection in the event of a power surge or dip. When there is a power failure, the UPS will automatically take over and keep the equipment functioning thus preventing hardware damage, software corruption and down time.

What is the range of UPS's supplied by PSS Distributors?

PSS Distributors supplies a full range of UPS's ranging from 720VA up to 2000MVA. Why choose us? We offer our clients many years of experience in power-related products and have more than 50 000 Uninterruptible Power Supply units in the market.

Do ups need a generator?

Larger UPS's have battery power for a few hours. Where it is essential for equipment to be operating constantly, a generator will be needed to supply power to the UPS to extend the Data Centre backup time indefinitely. Small UPS's provide power for a few minutes to allow the equipment to be shut down correctly.
