

# Price of UPS uninterruptible power supply for Sarajevo computer room

What is an uninterruptible power supply (UPS)?

What is a UPS? An uninterruptible power supply (UPS) is a type of backup battery that will continue to provide electrical power to the electronics that you have plugged into it even if electricity from your home outlets cuts out. Unlike a backup generator, it does not need to power up in order to start generating power.

Where can I buy computer uninterruptible power supply units?

Amazon.com: Computer Uninterruptible Power Supply Units - Computer Uninterruptible Power Sup...: Electronics New customer? Start here. Check each product page for other buying options. Only 6 left in stock - order soon. Online shopping for Uninterruptible Power Supply (UPS) from a great selection at Electronics Store.

Can a UPS battery backup cause a power outage?

In other words, if you experience a power outage in your area, your machinery should not shut down if it is plugged into a UPS battery backup. Many models of uninterruptible power supply USP also provide surge protection. A surge protector blocks spikes in voltage so that they do not harm your electronics.

How does the UPS protect from power surges?

The UPS protects from damaging surges and disruptive noise. Solid state automatic voltage regulation (AVR) boosts low input voltage and trims high voltage without battery operation. Network manageable via serial, USB or optional ethernet.

Do you need an uninterruptible power supply?

To protect your likely expensive investment, an uninterruptible power supply is integral. This applies especially to areas that suffer from frequent power outages, particularly rural areas, extreme climates, or places with bad power grids. In order to buy the right UPS, however, you'll need to make sure that some basic requirements are met.

Does uninterruptible power supply USP provide surge protection?

Many models of uninterruptible power supply USP also provide surge protection. A surge protector blocks spikes in voltage so that they do not harm your electronics. So, your battery backup is always at work, protecting your desktop computer, network equipment, or other electronic equipment and charging its battery when not in use.
