

# RV connects to outdoor power supply

Can I plug an RV into a home electrical outlet?

You can plug an RV into a home electrical outlet. Many campgrounds and all RV parks have power supply boxes with various electrical outlets that you can also plug into. Keep a few adapters with you in your RV, so you can connect to power anywhere you go!

How do I connect power to my RV?

To connect power to your RV, plug the male end of the RV power cable into the power supply box. If you are using an adapter, double-check the connection between the RV power cable and the female end of the adapter after plugging the male end of the adapter into the power supply box.

What is an RV power cable?

An RV power cable is a cord that begins within your RV and connects it to the power source. They're available with 30-amp and 50-amp plugs. 25-foot (30- and 50-amp plug) and 50-foot lengths are available (30-amp plug only). You may acquire a high-quality RV extension cable if you need more length.

Do RVs have a power cord?

Almost all RVs come with a power cord to plug into the electrical pedestal at a campground with hookups. This is also known as a "shore power" connection. These power cords come in two amperages: 30-amp and 50-amp. A 30-amp cord has three prongs, and a 50-amp has four.

What if my RV power supply is not working?

If your power supply is unstable or not working, turn the power off at the pedestal and contact someone at the campground for help. Connect one end of your RV's power cord to the surge protector. Connect the other end of your RV's power cord to the RV. Turn on the power at the electrical box. RVezy tip.

How do you Power an RV?

Turn on the power at the electrical box. RVezy tip. Most RV rentals come with 30- or 50-amp power cords. Generally, smaller RVs use 30-amp, while larger RVs use 50-amp outputs. In addition, campgrounds may sometimes have a 15- or 20-amp power source, which looks like a three-prong, residential-style outlet.

This adapter connects a 30 amp RV plug to a 4-pin 120v/240v generator plug. I carry a 15 amp adapter and a  
long 15a outdoor extension cord in the RV at all times. If I arrive at a camp site and the power post is really  
far, further than my 30a extension cords allow, then I can still connect at 15 amps.

A 50-amp extension cord is a lengthy wire that connects your RV's power connection to an electrical hookup.  
Its normal length is 20 to 50 feet. The most popular sizes for RV power cables are 20, 30, and 50 amps. A 30  
or 50 amp wire is standard for RVs. These two cable gauges do vary somewhat from one another, however.

This power company transformer then feeds 240/120-volt power to the campground's incoming service panel.  
You have the same thing in your own house, which might be a 100- or 200-amp service. For future discussion  
you ...
