The power received from the Sun is about  $1.8 \times 10^{11}$  MW, which equals 10,000 times the current energy demand rate of Earth (Parida et al., 2011, Mirzaei et al., 2014). Photovoltaic (PV) panels are used to convert solar energy into electrical energy. An ideal PV panel converts 6-20% of the incident solar irradiance into electricity (Dubey et al., 2013).
