

San Diego bifacial solar panel prices

What is the cost of solar panels in San Diego?

As of August 2024, the average solar panel system costs \$2.36/W including installation in San Diego, CA. For a 5 kW installation, this comes out to about \$11,800 before incentives, though prices range from \$10,030 to \$13,570. After the federal tax credit, the average price drops by 30%. You'll probably pay even less than what we show here.

How much does a 5 kW solar system cost in San Diego?

In San Diego, CA, a 5 kW solar system costs \$11,800.

How much do solar panels cost in California?

Based on our binding quotes, solar panels typically cost between \$3 to \$4 per watt in California. You might find a lower figure elsewhere, but make sure that: The figures below are from a real quote for a 4.4 kW solar system presented to a solar.com customer in San Diego.

Is San Diego a good city for rooftop solar?

With ample sunshine and some of the country's highest grid electricity prices, San Diego is perhaps the best city in America for rooftop solar. In this article, we'll cover the cost of solar panels in San Diego versus the cost of grid energy, and how much you can save over the 25-year life of a solar system.

Are solar panels cheaper than grid electricity in San Diego?

Even without the 30% federal tax credit, the cost of electricity from solar panels is more than four times cheaper than grid electricity in San Diego. And that's just in the first year. These savings can be expected to increase each year as the cost of electricity rises.

How much do solar panels cost?

This is lower than the average price of residential solar power systems across the United States which is currently \$3.00 per watt. The size of a solar panel system also plays a role in how much the installation will cost. Larger solar installations will typically have a lower cost per watt, because the panels can be purchased at a 'bulk price'.
