

Slovenia 150MW energy storage project

What does the European Commission's EUR150 million scheme mean for Slovenia?

The European Commission has approved a EUR150 million Slovenian scheme to support the rollout of renewable energy and heat as well as energy storage, in line with the Green Deal Industrial Plan.

What is the Slovenian energy policy?

The purpose of the measure is to accelerate the deployment of investments in renewable energy production and energy storage, with the aim to foster the transition to a net-zero economy. The Commission found that the Slovenian scheme is in line with the conditions set out in the Temporary Crisis and Transition Framework.

What does EU state aid mean for Slovenia?

European commission. The European Commission (EC) on Friday approved, under EU state aid rules, a EUR-150-million (USD 161m) scheme in Slovenia that aims to support the expansion of renewable energy, heat and energy storage.

Is the Slovenian scheme in line with the temporary crisis & Transition framework?

The Commission found that the Slovenian scheme is in line with the conditions set out in the Temporary Crisis and Transition Framework. In particular, the aid (i) will be granted on the basis of a scheme with an estimated capacity volume and budget; and (ii) will be granted no later than 31 December 2025.

Aypa Power, a Blackstone portfolio company, has secured \$323m in financing for its Kuna project in Idaho, US. The 150MW/600 megawatt hours (MWh) facility, situated near Boise in the city of Kuna, will become Idaho's largest battery energy storage project by mid-2025.

EDF Renewables in North America has signed a 150MW solar-plus-storage 20-year power purchase agreement (PPA) with utility El Paso Electric in New Mexico, US. The Milagro solar-plus-storage project will be ...

Slovenia plans to provide individual grants of up to EUR25 million per beneficiary to encourage investment in ramping up clean energy projects. The aid package was approved under the EU's state aid temporary crisis and ...

The European Commission has approved a EUR150 million Slovenian scheme to support the rollout of renewable energy and heat as well as energy storage, in line with the ...

ESB partnered with Fluence and Powercomm Group to deliver this project. Image: ESB. Irish state-owned electricity company ESB has opened a 150MW/300MWh battery energy storage system (BESS) at its Aghada site in Co Cork. The project is the latest step in ESB's commitment to investing EUR300 million (€251 million) in battery storage technology.

Slovenia 150MW energy storage project

Plans by Vistra Energy to build battery storage in the place of retiring fossil fuel plants in Illinois have been handed a boost by the Federal Energy Regulatory Commission (FERC). US electricity retail and generation company Vistra has proposed to build battery energy storage system (BESS) projects at its Joppa and Edwards power stations.

Plus Power has closed financing for a 150MW/300MWh standalone battery energy storage system (BESS) project in Massachusetts, US. ... Plus Power said that its Cross Town Energy Storage project began ...

News April 17, 2025 News April 17, 2025 News April 17, 2025 Premium Features, Analysis, Interviews April 17, 2025 News April 17, ...

With a capacity of 150MW/300MWh, the Ferrybridge site will be three times the size of SSE's flagship battery storage site in Salisbury. Image: SSE Renewables. The first batteries have arrived at SSE Renewables' battery storage project in Ferrybridge, West Yorkshire, where installation will continue until late June.

BLM has approved the Alta Wind Battery Energy Storage System project, which will be located within the existing right-of-way land of the Alta 1 Wind Facility project in Kern County, California. ... The Register said it would generate 150MW of power and "store up to 1,200MW" of electricity. In response to a query from Energy-Storage.news ...

Singapore-headquartered engineering firm Sembcorp announced the receipt of a letter of award (LOA) from the Indian government agency this morning. Sembcorp has won the rights to construct a 150MW solar PV and 300MWh battery energy storage system (BESS) project on a build-own-operate basis.

June 15, 2023: The European Commission said on June 9 it had approved a EUR150 million (\$163 million) state-aid scheme to develop battery storage and renewables in Slovenia. Slovenia ...

The 150MW Minety battery storage project being developed by Penso Power in Wiltshire, south-west England, UK is the biggest battery storage development in Europe. The grid-scale mega battery energy storage project comprises three adjacent battery storage facilities of 50MW capacity each.

Sungrow and CEEC Successfully Commission 300MWh Energy Storage Project in Uzbekistan . Tashkent, Uzbekistan, January 24, 2025 /PRNewswire/ - Sungrow, a global leader in PV inverters and energy storage systems (ESS), in collaboration with China Energy Engineering Corporation (CEEC), is proud to announce the successful commissioning of the ...

Major PV inverter manufacturer Sungrow Power Supply Co is building a 150MW floating solar plant in China in close proximity to its recently completed 40MW floating PV project - currently the world ...

Slovenia 150MW energy storage project

HSE, or Holding Slovenske Elektrarne, aims to have 175MW of flexibility resources online by 2030 before nearly quadrupling that number by 2035. The 800MW will be made up of 590MW of pumped hydro energy ...

The Slovenian government will in September open a public call to distribute EUR 150 million (USD 163m) in funding under a recently-approved state aid scheme supporting the expansion of renewable energy, heat and energy ...

SSE Renewables has announced its final investment decision to move forward with a 150MW/300MWh battery energy storage system (BESS) project in Warrington, Cheshire. The BESS will be built at the site of SSE's former Fiddler's Ferry coal-fired power station, which was decommissioned in March 2020, with final demolition of its cooling towers ...

American battery energy storage systems developer GridStor has announced the acquisition of a 150MW/300MWh battery storage project in Texas from Balanced Rock Power (BRP). GridStor's recent acquisition and decision to expand its operations into the Lower Rio Grande Valley region in Texas is strategically timed.

The Slovenian government has approved a draft regulation that will provide EUR 150m of subsidies aimed at accelerating renewables deployment and energy storage, it said in ...

Developer and operator EsVolta has secured a US\$185 million senior secured credit facility for its US battery energy storage system (BESS) project pipeline. The new funds will allow EsVolta to secure obligations relating to interconnection, power purchase agreements (PPAs), equipment deposits as well as early pre-NTP (notice-to-proceed ...

The government of Cyprus has published guidelines for a scheme to support the deployment of approximately 150MW/350MWh of energy storage. ... Colorado-based IPP Korsail Energy has been dealt a blow in its quest to ...

The European Commission has given the go-ahead to a EUR150 million (US\$160 million) state aid scheme for renewable energy and energy storage in Slovenia. The executive ...

SSE Renewables has broken ground on its 150MW/300MWh battery energy storage system (BESS) in West Yorkshire, England, UK. The renewable energy arm of energy supplier SSE confirmed that the project is scheduled to be completed by the end of 2024 and will be able to provide the grid with 300MWh of flexible capacity for two hour periods.

Developer-operator GridStor has acquired a 150MW/300MWh battery energy storage system (BESS) project in Texas, US from Balanced Rock Power (BRP). Announced 3 February, the project will be built in Hidalgo County, Texas, which is located in the Lower Rio Grande Valley region of the Electric Reliability Council of

Texas (ERCOT) and is expected ...

Also approved for commercial operations was Aypa Power's BoCo BESS - a 150MW/330MWh standalone project located in Borden County, Texas. ... The UK & Ireland is the most mature and established energy storage market in Europe, with just over 5GW of total operational capacity at the start of 2025. With over 130GW in the pipeline for the UK and ...

The first phase of the 150MW project was commissioned in 2023. ... Tibet Caipeng PV-Storage Project was connected to the grid at 5,228 metres above sea level, making it the highest-altitude solar ...

The financing for the Vikings solar and storage project was completed using a combination of debt financing and tax credit transfer, which is possible under the Inflation Reduction Act (IRA). Vikings pairs 157MW of solar ...

The European Commission (EC) on Friday approved, under EU state aid rules, a EUR-150-million (USD 161m) scheme in Slovenia that aims to support the expansion of renewable energy, heat and energy storage.

Renewable energy developer Low Carbon has announced plans for a 500MW solar and energy storage project in Kent. ... Not in the UK, but in neighbouring Ireland, state-owned electricity company ESB has opened a 150MW/300MWh BESS at its Aghada site in County Cork. The project is the latest step in ESB's commitment to investing EUR300 million (£ ...
