What is a high efficiency inverter?

[High efficiency conversion]: The inverter provides 12V 24V 48V 60V 72V DC to 110V-120V/220V-240V AC pure sine wave technology, with high conversion efficiency (>90%), low no-load loss, and more energy saving.

How to choose a power inverter?

If you need the inverter to run the resistive load (like laptop, TV, electric cooker, LED light), please choose the inverter with continuous power higher than the appliance's rated power. For example, for the power inverter with continuous power 2500w, it is suggested to run the appliance with rated power less than 2500w.

How much power should an inverter use?

It is best to use 80% of the rated power. If you need the inverter to run the inductive load (for appliance such as compressor, motor, water pump), please calculate the power of inverter 3 to 7 times higher than the rated power of your appliance. Product Certification:
