

Solar AC Inverter 12v24v Universal

What is a 12V solar inverter?

The inverter's job is to turn power from DC to AC. 12V solar panels are applicable for small size solar system projects for: Most RV and motorhomes already have 12V batteries for AC, refrigerator, water heater control and lighting. So it makes perfect sense to use 12V for these type of systems.

Can a 12V solar panel use a 24V inverter?

A 12V solar panel must use with a 12V inverter and a 24V solar panel must use with a 24V inverter. On top of that a series connection is required to maintain the same voltage between the battery, inverter and the solar panel. Check out 12V, 24V and 48V inverters here. To keep things simple, just remember to keep the voltage the same.

How to choose a power inverter?

If you need the inverter to run the resistive load (like laptop, TV, electric cooker, LED light), please choose the inverter with continuous power higher than the appliance's rated power. For example, for the power inverter with continuous power 2500W, it is suggested to run the appliance with rated power less than 2500W.

How much power should an inverter use?

It is best to use 80% of the rated power. If you need the inverter to run the inductive load (for appliance such as compressor, motor, water pump), please calculate the power of inverter 3 to 7 times higher than the rated power of your appliance. Product Certification:

Why does the inverter come with a LED light?

Inverter comes with an LED light to indicate the problem. 9 kinds of protections: 1. Short circuit protection. When the load is short circuit, the inverter will stop working. 2. High temperature protection. When the use environment is stuffy, the heat of the inverter can not be radiated.
