Solutions. onsemi's silicon carbide (SiC) and innovative packaging technologies are the gateway to improved density, reducing system losses and simplifying cooling thus improving overall system reliability across a wide range of mission critical UPS systems. Our system expertise has been encapsulated into an array of optimized power modules supporting all key power stage ...

Uninterruptible Power Supply Systems (UPS) are redundant power supply devices that store power in a battery to which electronic equipment can be connected. They act as a firewall between the mains supply and the equipment. During an outage, overvoltage, voltage dip, etc., they provide continuity in the alternating current supply by transforming the direct current from ...

Although data centers and computer systems are one of the most common needs for a UPS, any company can benefit greatly from a backup power supply. We have worked to provide countless industries with the Industrial Uninterruptible Power Supply (UPS) Systems and Equipment they need, including medical and
