Supercapacitors typically do not need trickle charge or pre-charge, do not require charge termination and can be constantly topped off. Luckily, most chargers allow termination to be disabled. But only a few Li-ion chargers allow trickle charge to be disabled. Therefore, some modification from default settings and/or additional circuitry

# Supercapacitor Bank Price in West Africa

For the love of god, I couldn't find a satisfactory supercapacitor bank for a decent price, so I decided to roll my own. I found some reasonably priced single-cell 2.7V 100F supercaps that I plan to connect in series to get a 4-cell bank with 25F at 10.8V nominal. While researching the subject, I found out it's a good idea to also use some ...
