What is an on-grid 5kW inverter?

An on-grid 5kW inverter is easy to maintain and converts the direct current to alternating current for powering domestic appliances and even commercial equipment. These solar inverters typically offer high efficiency of around 93% to 96%. Also, the warranty period of these inverters is around 5-10 years.

What makes Growatt SPF different from other off-grid inverters?

A unique feature for the Growatt SPF that is not available on another off-grid inverter, is its capacity to supply the AC loads in parallel with grid + solar when the batteries & solar are not strong enough. The inverter will not go to bypass mode instantly when the energy reserves are low. Scheduled charging with built-in time.
