The project consists of the rehabilitation and upgrade of the obsolete and underused 21.7 km long urban railway line Abu Qir, in Alexandria, into a high frequency metro line to enhance the role of public transport in the city and promote sustainable mobility for citizens.

The project is anticipated to contribute towards efficient and sustainable water resources management in Egypt as well as to the Egyptian climate protection efforts. In addition, it is expected to have substantial environmental and social benefits, as it will reduce the levels of pollution in Lake Maryout, El Mex Bay and the Mediterranean Sea.
