

Valparaíso Chile pack battery

Which companies are building large-scale battery energy storage projects in Chile?

Enel is building a 67 MW/134 MWh battery, while CJR Renewable and Uriel Renovables are planning 200 MW/800 MWh and 90 MW/200 MWh projects, respectively. From pv magazine EES News site three different developers announced separate large-scale battery energy storage (BESS) projects collocated with solar farms in Chile.

Are battery energy storage systems a viable alternative for Chilean power producers?

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged as a profitable alternative for Chilean power producers.

How much does a battery cost in Chile?

In fact, batteries charged at nearly \$0/MWh during the day in the sunny, northern desert regions of Chile, sell energy at night for over \$100/MWh. Although projects such as Engie's BESS Coya are already enjoying these large spreads, this capacity payment will partially de-risk Chile's dependence on volatile, but still profitable, merchant revenues.

Is energy storage a key asset for Chile's energy transition?

In this context, storage has become the most critical asset for the energy transition in Chile going forward," added Tabbush. Flexen is a developer focused on standalone energy storage with 3GW under development in Chile, Spain and Texas.

Where is Enel Chile deploying a 67 mw/134 MWh battery?

Enel Chile, the local subsidiary of Italian energy company Enel, said it will deploy a 67 MW/134 MWh battery at the El Manzano solar power plant. The solar project with a capacity of 99 MW is located in the town of Tiltil, in the Chacabuco Province, Santiago Metropolitan Region.

How long does a battery last in Chile?

Moreover, the lack of an ancillary services market in Chile discourages shorter duration batteries (1-2 hours) as seen in the US and Europe. The general industry consensus is to maximize the availability of the battery and focus on 2-3 revenue streams instead of 4 to 5 (e.g., energy arbitrage, capacity payment, and frequency reserve).

Valparaíso was the first commercial port in Chile and today is Patrimony of the Humanity, and the Cultural capital in the country. The city has 45 hills and a colorful architecture that turn it in a singular city in the world. Its marvelous social and urban landscape is combined with the National Congress, house of the Chilean Legislative Power.
