In 2020, 1.7 billion external power supplies (EPS) were in use in the EU27, of which 75% for residential use, on average 6.5 units per EU household. They converted 48 TWh/a of electricity from the 220V mains to the input needed by the powered products. Per household, the EPS converted 185 kWh per year in 2020, 26% of the annual household electricity consumption.
