

# Which outdoor power supply is better in Manchester UK

Who is the largest supplier of electricity in the UK?

Octopus Energy is now the largest supplier of electricity and the second-largest (after British Gas) for gas. Its dramatic growth in recent years is as a result of it taking on 1.5 million customers from failed supplier Bulb and 1.3 million from Shell. Ovo Energy is currently the fourth-largest supplier.

How many energy suppliers are there in Great Britain?

Our annual energy satisfaction survey covers 16 suppliers in Great Britain. Our most recent results were published in January 2025 based on nearly 12,000 energy customers telling us about the service they receive. We also conducted our own in-depth assessment of firms' practices to find out which are set up in the best interests of their customers.

Do you need a professional electrician to install outdoor power sockets?

While some electrical jobs may seem easy, installing outdoor power sockets is often complex. It frequently involves navigating existing wiring and electrical regulations, so professional electricians are helpful for external power needs.

What is outdoor power socket installation?

Outdoor power socket installation changes how you use your garden. It lets you power tools, outdoor lighting, and pond pumps without messy extension cords and trip hazards. Because electricity and the outdoors can be risky, careful planning and electrical safety are essential.

How do you protect outdoor sockets in the UK?

Keep sockets away from water sources like ponds or taps. Ensure they're also out of reach of children and pets. Check UK building regulations, such as Part P, for placement rules. Easy access is helpful, whether for garden parties or trimming hedges. All outdoor sockets in the UK need RCD protection.

Do outdoor sockets need RCD protection?

Check UK building regulations, such as Part P, for placement rules. Easy access is helpful, whether for garden parties or trimming hedges. All outdoor sockets in the UK need RCD protection. An RCD (Residual Current Device) cuts off the power if there's a fault. This fast action prevents dangerous electric shocks.
