

Will energy storage products be subject to additional tariffs

What is the only tariff offered by So Energy?

So Energy only offers one tariff: So Birch. This is a 12-month fixed-price tariff that's paid by monthly direct debit.

Do business energy suppliers offer fixed tariffs?

Business energy suppliers do not offer fixed tariffs in the same way domestic suppliers do, due to the varied energy use of businesses. However, Pozitive Energy does provide information on its variable/deemed tariff.

Are tariffs affecting the global solar trade?

The threat of tariffs on countries that supplied more than \$10 billion of solar products to the United States last year, accounting for the vast majority of domestic supplies, has caused a dramatic shift in the global solar trade.

Are your customers aware of their energy tariff options?

With energy prices rising, many customers may wish to choose the stability of knowing the rates that they're paying for the year or two ahead, rather than the uncertainty of a variable tariff. We believe that it is our job as a responsible supplier to make sure that our customers are aware of their options so that they can make an informed choice.

Will a tariff be subsidised during high energy prices?

Ofgem chief executive Jonathan Brearley said the tariff would have to be subsidised during periods of high energy prices, and otherwise paid for with "funds raised in a progressive way".

Will tariffs hurt us solar producers?

Critics of the effort, including the Solar Energy Industries Association trade group, have said tariffs would harm US solar producers because they would raise prices on the imported cells that are assembled into panels by American factories.

The latest tariff will bring the total combined tariff on batteries and battery energy storage system (BESS) products from China to 48.4% from January 2026, Energy-Storage.news calculates. That is made up of: a 3.4% tariff on all battery goods globally

Lists of specific products that will be subject to additional tariffs can be found in the attached documents. For these products, corresponding tariffs will be added to the current tariff rates. Current bonded policies as well as tax reduction and exemption policies will not change, and the latest tariffs to be imposed will not be reduced or exempted, according to the statement.
